Why did solar make a joke about being a North Korean defector?

One fan also connected this announcement to Solar's 2016 light-hearted controversy about her allegedly being a North Korean defector. This controversy revolves around the idol making a joke at JTBC's *Knowing Brothers* about her being a North Korean defector when several people questioned the lack of pictures from her past.

Are solar panels a real thing in North Korea?

Larger solar installations have also sprung up at factories and government buildings over the past decade. Jeong-hyeon, a North Korean escapee, told the *Financial Times* that many residents in Hamhung, the second-most populous city, "relied on a solar panel, a battery and a power generator to light their houses and power their television".

Does North Korea need solar power?

North Korea is increasingly turning to solar power to help meet its energy needs, as the isolated regime seeks to reduce its dependence on imported fossil fuels amid chronic power shortages.

Can solar power solve North Korea's energy problems?

Jeong-hyeon, a North Korean escapee, told the *Financial Times* that many residents in Hamhung, the second-most populous city, "relied on a solar panel, a battery and a power generator to light their houses and power their television". But solar power is still only a partial solution to the country's energy woes.
