The Sultanate Oman and the European Union (EU) are exploring deeper collaboration to accelerate the energy transition through innovative technologies, smarter ...

Electrochemical energy storage and conversion systems such as electrochemical capacitors, batteries and fuel cells are considered as the most important technologies proposing ...

Electrochemical energy storage is transforming the Middle East's industrial and commercial sectors, supporting renewable energy integration, grid stability, and sustainability.

Muscat - Oman will soon announce its first renewable energy storage project as part of ongoing efforts to expand clean energy capacity and reduce dependence on ...

This paper aims to review energy storage options for the Main Interconnected System (MIS) in Oman. In addition, it presents a techno-economic case study on utilising pumped hydro energy ...

It is set to be the first energy storage project of its kind in the Middle East based on CO₂ battery energy storage technology. A site has been identified for the establishment for ...

Muscat - Oman will soon announce its first renewable energy storage project as part of ongoing efforts to expand clean energy capacity ...

As Middle Eastern countries race to diversify from oil dependence, Oman's energy storage enterprises are quietly building the region's most innovative battery farms and thermal storage ...

Designed for policymakers, renewable energy developers, and tech-savvy environmentalists, this megaproject could become the Middle East's blueprint for grid resilience.

Energy Dome, which makes technology for energy storage, has closed a EUR55 million (~\$60 million) funding round, with investors that include Oman's sovereign wealth fund.

Google invests in Italy's Energy Dome to deploy in Oman a long-duration CO₂-based storage solution, in partnership with Takhzeen Oman and the sovereign wealth fund Oman Investment ...
