Each option has its unique properties, making the decision dependent on your specific application and requirements. This article ...

The Lithium Battery Module Stainless Steel Belt (Strapping) is a durable, high-precision component designed to secure battery packs. Made from premium 201 or 304 stainless steel, ...

For over 20 years, we have been dedicated to providing innovative lithium battery module PACK production lines, CCS production line, high ...

For over 20 years, we have been dedicated to providing innovative lithium battery module PACK production lines, CCS production line, high-precision laser equipment And lithium battery ...

For groups of prismatic or pouch batteries, steel straps are usually used to fix the modules. Special strapping belt for power battery module.

Our Steel Strap Belt, designed specifically for Energy Storage Prismatic Lithium Battery Module Pack Assembly, Our Steel Strap Belt is highly compatible with a wide range of prismatic ...

At present, the bundling method of lithium battery module is mostly stacked extrusion, and the materials used are mainly PET tape ...

At present, the bundling method of lithium battery module is mostly stacked extrusion, and the materials used are mainly PET tape and steel tape. Steel tape is a narrow ...

Nickel belt is based on low carbon steel, and both sides are plated with nickel. Pay attention to moisture-proof when the side incision is not plated with nickel.

Our Steel Strapping, specifically engineered for assembling prismatic lithium-battery modules in energy storage packs, offers broad compatibility with various sizes and types of prismatic ...

Each option has its unique properties, making the decision dependent on your specific application and requirements. This article examines the key factors to consider when ...

The material is stainless steel 201 LH with a thickness of 1mm, the material yield strength exceeds 1050MPa, the tensile strength exceeds 1350MPa, and the solder joint tensile force is greater ...

High-strength steel strap belt for energy storage prismatic lithium battery modules. Features SUS201/301/304 material, ≥ 1300 MPa tensile strength, and UL94V0 protection.
