With the Philippines grappling with grid instability and surging residential energy demands, the company spotlighted two flagship innovations: its utility-focused PowerTitan 2.0 battery ...

The energy storage market in the Philippines is growing fast, with lots of new projects and technologies popping up. This growth aligns with the goals of the Philippine ...

Explore the Philippines' new solar project featuring cutting-edge battery storage systems, aimed at boosting renewable energy capacity and sustainability.

With the Philippines grappling with grid instability and surging residential energy demands, the company spotlighted two flagship innovations: its ...

These include 14 new projects and three amendments, featuring technologies such as wind, solar, hydro, geothermal, and battery energy storage systems (BESS). Of the 17 ...

As the Philippine government set a target of achieving 50% renewable energy by 2040, the conversation around energy storage intensified. Policymakers began to recognize ...

Nearly 5 GWh of new battery energy storage systems (BESS) will be deployed through hybrid solar-plus-storage projects, signaling the emergence of storage as a core ...

The projects entail the integration of a 16 MW battery storage system at the existing Magat hydropower facility and a new 40 MW system at the Binga hydropower site, an ...

ACEN aims to integrate renewable energy better and further enhance grid reliability through its pioneering
