Is energy storage a good investment in Poland?

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped up the capacity of storage projects.

Will BYD develop a battery energy storage system in Poland?

BYD has signed an agreement with Poland's Greenvolt Powerto develop a battery energy storage system project in the European country. Construction of the project has begun and is expected to be completed in the first quarter of 2026. (File photo shows BYD's energy storage products. Image credit: BYD)

What happened to energy storage in Poland?

The Energy Regulatory Office said in a report last year on electricity storage in Poland that, as a result of the main power market auctions for 2021-2028 and the supplementary auctions for 2012-2025, contracts for energy storage with a total capacity of 9.5 GW were concluded.

What is Poland's new energy storage scheme?

The scheme has been brewing since 2024, with the final regulation published in the Journal of Laws of the Republic of Poland in March this year. It received European Commission approval, which authorised state aid of EUR1.2 billion in state aid to support at least 5.4 GWh of new electricity storage facilities.

Its first project is a 263MW/900MWh BESS in Zarnowiec, which will be supplied locally by batteries manufactured in LG Energy Solution's plant in Wroclaw as reported by ...

Learn about Poland's EUR1 billion energy storage subsidy aimed at installing 5.4 GWh of BESS by 2028, strengthening grid stability and accelerating the green transition.

The program provides funding for the construction of electricity storage facilities with a power rating of not

less than 2 MW and a capacity ...

Eligible projects must have a capacity of at least 2 MW/4 MWh, connected to the distribution and transmission network at all ...

WARSAW, March 3 (Xinhua) -- A contract for the design and operation of two large-scale energy storage projects in Poland has been signed between Greenvolt Power, a ...

Due for Q1 2026 completion [8], this project's 800MWh per site configuration directly addresses Poland's need for long-duration storage solutions beyond typical 4-hour systems.

The program provides funding for the construction of electricity storage facilities with a power rating of not less than 2 MW and a capacity of not less than 4 MWh connected to the ...

Eligible projects must have a capacity of at least 2 MW/4 MWh, connected to the distribution and transmission network at all voltage levels. The scheme has been brewing ...

A group of Polish mountain rescuers needing immediate power during a blizzard. Instead of bulky generators, they whip out suitcase-sized battery units - Poland's portable ...

In Poland, interest in energy storage investment has been evident for some time. Last year's main auction of the power market, with capacity delivery for 2029, further bumped ...

BYD has signed an agreement with Poland's Greenvolt Power to develop a battery energy storage system project in the European country. Construction of the project has begun ...

The deal supports some of Poland's first large-scale battery storage projects and represents R.Power's first euro-denominated issuance under its PLN 1 billion green bond programme.
