There are three main types of Uninterruptible Power Systems: online, offline, and line-interactive. Each type offers different features, and ...

An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter -- which turns the battery's stored energy into usable power -- in one.

With a variety of UPS options available, choosing the right one depends on factors like power capacity, battery runtime, and the type of devices you need to support.
