---

Long-duration energy storage (LDES) will play an increasingly important role in decarbonizing the power sector as more variable renewable energy is added to the electric power grid. LDES is ...

A policy primer exploring how energy storage technologies work, the benefits that storage can deliver to the electric grid, the current ...

PNNL works as a trusted broker in assessing barriers and opportunities for energy storage assets to bolster the electric grid. Our expertise includes ...

Solar power and battery storage are booming despite Trump policy whiplash as clean energy meets soaring data center demand

The underlying motivation for DOE's strategic investment in energy storage is to ensure that the American people will have access to energy storage ...

Energy policies provide essential support to energy storage by creating favorable market conditions and reducing financial barriers. These policies each have their strengths ...

CEG provides information, technical guidance, policy and regulatory design support, and independent analysis to help break down ...

The underlying motivation for DOE's strategic investment in energy storage is to ensure that the American people will have access to energy storage innovations that enable resilient, flexible, ...

Delivered quarterly, the US Energy Storage Monitor from the American Clean Power Association (ACP) and Wood Mackenzie Power & Renewables provides the clean ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

A policy primer exploring how energy storage technologies work, the benefits that storage can deliver to the electric grid, the current legal and regulatory barriers to adoption, ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload ...

CEG provides information, technical guidance, policy and regulatory design support, and independent analysis to help break down the barriers to energy storage ...

Battery energy storage system (BESS) deployment in the United States is accelerating as rising power demand, including from data centres, drives the need for flexible capacity and grid support.

PNNL works as a trusted broker in assessing barriers and opportunities for energy storage assets to bolster the electric grid. Our expertise includes evaluating life-cycle costs and performance, ...
