Should you replace a circuit breaker?

Learning how to replace a breaker can save you from minor irritations, like flickering lights and circuit breaker trips every time you plug in the vacuum cleaner. However, a wonky circuit breaker can sometimes indicate a fire or electrical shock hazard.

How do you change a circuit breaker?

To change a circuit breaker, find the main circuit breaker box and locate the defective breaker by looking for a tripped breaker. Next, turn off the branch breaker boxes, the main power, and the individual breakers. Remove the screws holding the circuit panel's face plate, then loosen the screws holding the wires on the defective breaker.

How much does it cost to replace a circuit breaker?

To ensure your circuit breaker is replaced correctly, you should hire a licensed electrician to take over the task. Hiring a professional electrician will cost between \$50 and \$100 per hour, and replacing a circuit breaker takes around 30 minutes. Your final price depends on the type of breaker, its location, and the project's complexity.

How do you fix a faulty circuit breaker?

If all is clear, carefully remove the faulty circuit breaker by unhooking it from the panel's hinge and pulling it out. Use a flathead screwdriver with a rubber handle to loosen the wire connecting the old circuit breaker to the panel. Safely tuck the exposed wire into the breaker box to avoid safety hazards.
