GIGA Storage realizes large-scale sustainable energy storage. Through smart use of large-scale energy storage, parties can be connected more quickly at lower social costs, using more ...

Summary: Explore the latest rankings of small energy storage stations in Riga, uncover industry trends, and learn how innovative solutions like those from EK SOLAR are transforming Latvia's ...

Abstract: This paper presents a novel application of Pumped Storage Hydro (PSH) in which seawater and constructed reservoirs are used to generate renewable, gravitational potential ...

LEC, in cooperation with a partner, is constructing a battery energy storage system (BESS) with a total capacity of 8.4 MW / 16.8 MWh at the TEC-1 site in Riga.

As we approach Q4 2025, Riga's storage capacity is projected to triple, potentially eliminating the need for one natural gas peaker plant entirely. Now that's what we call powering progress!

The Turkish government plans to begin approving energy storage projects in the middle of 2023, which should support the Turkish grid in the wake of growing solar photovoltaic (PV) capacity.

As of 2025, Latvia's energy storage capacity has grown 300% since 2020, with Riga leading this charge [8]. This isn't just about keeping smartphones charged; it's about rewriting Europe's ...

Another promising technological solution that R?GAS SILTUMS is exploring is the use of a sand-based heat accumulator, which can store thermal energy for several months. A ...

Backed by BlackRock's Diversified Infrastructure business, Jupiter Power has a strategic and established portfolio of utility-scale energy storage projects operating or in construction in the ...

Summary: The Riga battery energy storage project represents a critical step in advancing renewable energy integration and grid stability in the Baltic region. This article explores the ...
