-----  
Where is a 100 MW solar facility being built in Riga?

The 100 MW solar facility will be constructed on a 177.2-hectare site in Spilve Meadows, on the left bank of the Daugava River in Riga. This project is part of the Freeport's plan to transform the area into a hub for solar electricity production, energy storage, hydrogen, and alternative fuel production, as well as an industrial and logistics park.

Will a Solar Park transform Riga into green energy?

Home Port News Major solar park set to transform port of Riga into green energy... On 9 September, an agreement was signed between the Freeport of Riga Authority and Lithuanian company SNG Solar for the lease of land in the Spilve Meadows area of the Latvian port.

How will SNG solar benefit the Freeport of Riga?

Earlier this year, SNG Solar secured the land lease rights through an auction. The Freeport of Riga will receive 2.5% of the green energy generated, which will support port infrastructure and operations. The plant is expected to produce about 100,000 MWh of green electricity per year.

How much will SNG solar invest in Riga?

Total investment is projected to be between EUR60 million (\$66.8 million) and EUR80 million. Earlier this year, SNG Solar secured the land lease rights through an auction. The Freeport of Riga will receive 2.5% of the green energy generated, which will support port infrastructure and operations.
