We delved into pressing issues facing the energy storage sector and heard from industry representatives about what is needed to foster the deployment of energy storage in Europe, ...

Europe's largest airport solar-battery integration, boosting energy resilience and circular economy leadership. Rome's Fiumicino International Airport has launched Pioneer, ...

The storage system accumulates renewable energy to be used even when the sun is not out, and leverages used electric vehicle batteries, giving them a second life.

As the penetration of solar power increases, grid stability has become a critical issue. In response, Italy is prioritizing the development of grid-scale battery energy storage ...

Rome's Fiumicino Airport is utilizing repurposed EV batteries for energy storage to reduce emissions and support circular economy goals, aligning with its 2030 carbon neutrality ...

As battery reuse becomes an increasingly vital pillar of energy policy, this pioneering system could serve as a model for airports and industrial zones across Europe ...

But here's the silver lining - the new cross-border storage initiative with France and Switzerland could add 15GW of flexible capacity by 2030. As we approach Q4 2025, all eyes are on how ...

An innovative energy storage system is helping Rome Fiumicino International Airport (FCO) harness renewable energy more effectively, capturing power for use even when ...

Italy's largest energy storage system based on used batteries for electric vehicles was inaugurated on Tuesday

Rome s policy on new energy and energy storage
