---

BYD Energy Storage and Saudi Electricity Company (SEC) have signed a contract to deliver the world's largest grid-scale energy storage project totalling 12.5GWh. This ...

The project comprises three sites with a total installed capacity of 7.8GWh, located in the Najran, Madaya and Khamis Mushait regions of ...

Energy storage plays a crucial role in this transition, providing grid flexibility and enabling the integration of intermittent power sources like solar and wind. This project is one of ...

KHAMIS MUSHAIT, December 22, 2025 - Saudi Arabia has completed the grid connection of a 7.8 GWh battery energy storage project that is set to become the world's largest operational ...

BYD Energy Storage and Saudi Electricity Company (SEC) have signed a contract to deliver the world's largest grid-scale energy ...

This initiative is a key part of Saudi Arabia's Vision 2030, which aims for renewables to generate half of the country's electricity by ...

The project comprises three sites with a total installed capacity of 7.8GWh, located in the Najran, Madaya and Khamis Mushait regions of Saudi Arabia. Delivery is scheduled to ...

Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the ...

Saudi Arabia is making history with the world's largest grid-scale battery energy storage project. BYD Energy Storage has signed a 12.5 GWh contract with the Saudi ...

Saudi Arabia is making history with the world's largest grid-scale battery energy storage project. BYD Energy Storage has signed a ...

BYD and Saudi Electricity Company are accelerating clean energy goals by delivering a record 15.1GWh of storage to advance Saudi Arabia's Vision 2030.

The Kingdom of Saudi Arabia has successfully completed the grid connection of its landmark 7.8 GWh energy storage system (ESS), setting a new global benchmark in battery ...

Under the supervision of the Ministry of Energy, the Saudi Electricity Company (SEC) has announced the launch of the second phase of its battery energy storage system ...

This initiative is a key part of Saudi Arabia's Vision 2030, which aims for renewables to generate half of the country's electricity by the end of the decade. The new ...

Saudi Arabia has officially connected its largest battery energy storage system (BESS) to the grid, marking a significant milestone in the country's renewable energy expansion.

Energy storage plays a crucial role in this transition, providing grid flexibility and enabling the integration of intermittent power sources ...
