What are the main goals of energy policy in Serbia?

The new geopolitics circumstances indicate that energy security improvement, achievement of maximally possible energy independence, and economic sustainability of energy systems remain the dominant goals in the energy policy of the Republic of Serbia.

What is the energy consumption structure in Serbia?

The structure, by consumption sector, is shown in Figure 23. Energy consumption in households accounts for more than one third of the final energy consumption in the Republic of Serbia. In this sector, more than 70% of energy is used for space heating and hot water preparation.

What are the key priorities for energy development in Serbia?

Energy security, energy market development, and overall transition to sustainable energy were adopted as key priorities for the energy development of the Republic of Serbia, as well as the principles upon which the energy policy until 2030 needed to be developed.

Why is the energy sector important in Serbia?

The energy sector is the mainstay and support for the Republic of Serbia's overall economic and social development. Energy security, reliable and secure supply of adequate quantities and high-quality energy, and energy sources are the basic postulates of energy sector development.
