Expansion of the desalination plant to double its capacity, and construction of a solar energy plant to fully power the plant, including related PV plant and water treatment infrastructure.

Djibouti's first solar-powered desalination plant is a key planned initiative for Moucha Island, with a target operational date of late 2025. This forward-thinking project aims ...

This eco-friendly facility, the second desalination plant of its kind in Djibouti, will provide safe drinking water to approximately 5,000 residents. Construction is expected to be ...

Project to improve drinking water and sanitation services for the capital city of Djibouti through the construction of Doraleh Desalination Plant, and Doraleh, Balbala and ...

This high-quality solar desalination plant does not require any other installation work, minimising labour and logistics costs. A modular container houses the pre-filtration ...

The new projects supported by the EIB will focus on the implementation of advanced water desalination technologies and the enhancement of wastewater treatment ...

The 25-year financing will support a solar-powered desalination scheme to transform water security and increase access to clean drinking water and wastewater ...

Enter the containerized wastewater treatment plant (CWWTP) -- a game-changer that offers modular, scalable, and efficient treatment solutions tailored to diverse settings.
