We are focusing on product development, production, system integration, sales and service. Products include solar panel, Turn-key completed on-grid, off grid and hybrid solar systems, ...

Our 20 and 40 foot shipping containers are outfitted with roof mounted solar power on the outside, and on the inside, a rugged inverter with power ready battery bank.

Discover our range of innovative solar panels on shipping container products engineered to meet your renewable energy needs with maximum efficiency and reliability.

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini power station using solar panels.

It is an autonomous, solar-powered cooling system that can be integrated into various agricultural value chains. Our solution can store agricultural products such as fruits, vegetables, herbs, ...

OffGridBox is a project design and engineering company that provides renewable energy and clean water to remote communities around the world, with a focus on Energy for Health.

It is an autonomous, solar-powered cooling system that can be integrated into various agricultural value chains. Our solution can store agricultural ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini ...

Liquid cooling offers superior thermal management, maintaining optimal battery temperature under high
