---

The California grid regularly breaks solar generation peak record levels - the latest solar peak recorded in late May was over 21,500 ...

A U.S. solar industry group on Wednesday unveiled an aggressive goal to deploy vast amounts of energy storage capacity by 2030 to help renewables serve power-hungry ...

The Solar Energy Industries Association (SEIA) has released a whitepaper recommending the US deploy 10 million distributed solar installations and reach 700GWh of ...

"Storage" refers to technologies that can capture electricity, store it as another form of energy (chemical, thermal, mechanical), and then release it for use when it is needed. Lithium-ion ...

MOJAVE, CA -- Mayor Karen Bass today announced the completion of the Eland Solar-plus-Storage Center project, one of the largest solar and battery energy storage projects ...

Learn what storing solar energy is, the best way to store it, battery usage in storing energy, and how the latest innovations like California NEM 3.0 affect it.

The California grid regularly breaks solar generation peak record levels - the latest solar peak recorded in late May was over 21,500 MW of solar generation. The state is also ...

Even as the Trump administration rolled out a series of anti-clean energy policies, solar and storage still accounted for 82% of all new power added to the grid in its first six months.

Once completed, the 2,000 MW Bellefield project is expected to be the largest solar-plus-storage facility in the United States.
