---

The full Eland Solar + Storage Project, which was developed by Arevon Energy, is now fully operational. The two-phase Eland project, sited near Mojave in Kern County, is one ...

Tesla continues to cement its position as a major force in grid-scale energy storage, with a new \$500 million battery energy storage system (BESS) set to come online in ...

Sheep graze among the panels at the Sherco Solar power plant in Minnesota, which is slated for a major solar plus storage expansion.

There are over 1,350 major energy storage projects currently in the database, representing more than 108,000 MWh of capacity. The list shows that there are more than 185 ...

One of the US's largest solar + battery storage projects is now fully online in Mojave, California.

The project includes a 1,150-megawatt (MW) solar facility with approximately 3.1 million panels and up to 1,150 MW (4,600 megawatt-hours) of battery storage - enough to ...

Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

These massive solar plus storage facilities are helping California move away from fossil fuels by delivering solar energy during evening hours and improving grid reliability.

California already has the most utility-scale battery storage systems nationwide but it is about to set a new record. According to developer Intersect Power, the company aims to ...

It is currently the largest single solar and battery energy storage project to reach this milestone. Site construction commenced in Q1 2021 and reached substantial completion in 2023.
