For the latest updates and more information, visit our website: <https://www.afasystem.info.pl>

Our production skills encompass all the steps in hot bending plus the processing of glass up to a maximum length of 11.5m. sedak has several bending chambers in which half-shells and other ...

Continuous Glass Bender Belt Conveyor for Small Medium Glass Size High Volume Production Pre-Heat, Bend, Anneal & Cool done all the way ...

Casso-Solar Technologies" Ballistic Glass Bending Furnaces are specifically designed to bend ballistic glass with thicknesses up to 100mm. The ...

General Specifications for Bending and Tempering Oven Product to Bend: Glass Product Size: 32? x 32? Maximum Glass Thickness: 3/16 " Minimum Depth of Sag Bend: 1? Minimum/10? ...

Intermittent hot bending furnaces have only one chamber and a long processing cycle, requiring several hours, making them suitable for ...

This cutting-edge machine is designed to bend glass at high temperatures with unparalleled efficiency and precision, enabling the creation of custom shapes and designs effortlessly.

Casso-Solar produces equipment for architectural, automotive, aerospace, and ballistic glass applications. Machines can be built to bend glass of just about any size, thickness, and bend ...

Computational design paired with the new bending tempering equipment extends the boundaries for complex free-form glass façades. ...

Intermittent hot bending furnaces have only one chamber and a long processing cycle, requiring several hours, making them suitable for producing small batches of oversized hot bending ...

Based on 50 years of experience and technology, we continue to improve hot bending, strengthening processing technologies of high-precision glass, with business cooperation with ...

Now, to meet the specific needs of solar industry customers for tightly specified glass shapes, Glasstech has once again taken the knowledge and ingenuity acquired across the globe to ...

General Specifications for Bending and Tempering Oven Product to Bend: Glass Product Size: 32? x 32?
Maximum Glass Thickness: 3/16 " Minimum ...

Computational design paired with the new bending tempering equipment extends the boundaries for complex free-form glass façades. Innovative curved glass manufacturing ...

Casso-Solar Technologies" Ballistic Glass Bending Furnaces are specifically designed to bend ballistic glass with thicknesses up to 100mm. The heaters used in these furnaces are specified ...

Continuous Glass Bender Belt Conveyor for Small Medium Glass Size High Volume Production Pre-Heat, Bend, Anneal & Cool done all the way Suitable for Glass Baking, Cooking, ...
