---

Founded in 2007 and Headquartered in metro-Atlanta, Georgia, Suniva is the leading American manufacturer of high-efficiency crystalline silicon photovoltaic (PV) solar ...

After REC Silicon closed shop and Qcells lost its domestic polysilicon supply, the country has been lacking a roadmap for a 100% American silicon solar panel. Today, a new ...

Three U.S. firms, Suniva, Heliene, and Corning, are launching the first fully "Made in America" silicon solar module, aiming to produce 1GW annually.

Founded in 2007 and Headquartered in metro-Atlanta, Georgia, Suniva is the leading American manufacturer of high-efficiency ...

The factory will receive raw silicon from mined quartz via rail and create chunks of polysilicon, which can then be turned into ingots and wafers for solar cells within solar panels ...

Explore the solar panel manufacturing industry in California by discovering the top 20 companies like SolarCity and Sunrun. Learn about their contributions to sustainable power generation.

Corning, Suniva and Heliene combine strengths to produce what will be the first solar module with polysilicon, wafers and cells made in the United States.

German-headquartered Wacker Chemie and Hemlock Semiconductor are currently the only two U.S. producers of solar-grade polysilicon. Wacker has a site in ...

German-headquartered Wacker Chemie and Hemlock Semiconductor are currently the only two U.S. producers of solar-grade ...

RESOLAR has developed the innovative GST green dismantling solution and self-developed SWT silicon material impurities removing technology. These technologies can convert ...

The solar industry recently welcomed the largest silicon solar cell manufacturing outfit to ever open its doors within the United States -- the 3-GW factory operated by ES ...

"This partnership is a significant milestone for the U.S. solar industry," said Martin Pochtaruk, CEO of Heliene. "By combining our strengths, we are able to deliver not only a high ...
