People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax ...

Twenty firefighters responded to a fire involving photovoltaic panels in the Port of Gandia area of Spain and to an explosion of an associated containerized battery. An explosion ...

What is solar energy? Solar energy comes from the limitless power source that is the sun. It is a clean, inexpensive, renewable resource that can be harnessed virtually ...

California leads the nation in a race to deploy battery energy storage facilities. They bank electricity from sources like solar and wind so it can be used later.

Let's catch up on what happened in this fire, what the lingering concerns are, and what comes next for the energy storage industry.

AUSTIN, Texas (AP) -- A fire at one of the world's largest battery plants in Northern California contained tens of thousands of ...

On Wednesday of last week, an explosion occurred in a residential building in Sch#246;nberg, Schleswig-Holstein, in which an outer ...

BESS safety involves mitigating explosion and fire hazards through various techniques such as deflagration venting, emergency ...

Twenty firefighters responded to a fire involving photovoltaic panels in the Port of Gandia area of Spain and to an explosion of an ...

BESS safety involves mitigating explosion and fire hazards through various techniques such as deflagration venting, emergency ventilation, and exposure protection.

Evacuations were lifted Friday night for people near an ongoing fire that erupted Thursday at one of the world's largest battery storage plants in the northern half of California.

A massive fire that destroyed much of a huge battery storage facility in Moss Landing raised questions, and possible new hurdles, Friday for California's efforts to shift most ...

A report released Friday by a clean-energy trade group spells out best practices for safe use of large-scale battery energy storage systems following a major fire at a battery ...

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what ...

A massive fire that destroyed much of a huge battery storage facility in Moss Landing raised questions, and ...
