-----

Cemex and Synhelion are on their way toward achieving a fully solar-powered cement production with the latest scaling of their technology to industrially-viable levels.

Cemex and Synhelion will now take further steps toward building a solar-driven industrial-scale pilot cement plant.

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

In the CemSol research project, a team of scientists is developing and demonstrating a solar-heated calcination plant to produce ...

Synhelion and Cemex announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially ...

Synhelion and Cemex collaborate to pioneer solar-powered cement production. Synhelion's technology, originating from ETH Zurich, uses solar radiation to produce syngas for cement ...

Synhelion and Cemex announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the ...

For the first time ever, CEMEX and Synhelion successfully connected the clinker production process with the Synhelion solar receiver, producing solar clinker. This ...

In the CemSol research project, a team of scientists is developing and demonstrating a solar-heated calcination

plant to produce cement. This process produces ...

Advancing from that stage to production under plant-like and continuous conditions reaffirms the tremendous potential of this technology to reach industrial-scale implementation. ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the ...

Cemex and Synhelion announced today a significant milestone in their joint effort to develop fully solar-driven cement production: the scaling of their technology to industrially ...

CEMEX and Synhelion have announced a significant milestone to develop fully solar-driven cement production by scaling their technology to industrially-viable levels. This ...

Synhelion and Cemex collaborate to pioneer solar-powered cement production. Synhelion's technology, originating from ETH Zurich, uses ...

Advancing from that stage to production under plant-like and continuous conditions reaffirms the tremendous potential of this ...
