-----

The proposed project will initiate and contribute to the transformation of the Kiribati energy sector to one that is low-carbon and adapted to growing climate and natural hazards.

The project will ultimately drive down the cost of power generation, reduce the country's reliance on imported fossil fuels, and enhance institutional capacity across the sector, including through ...

With 37% of development aid now requiring storage components, South Tarawa's becoming a living lab for island nations worldwide. The real question isn't whether energy storage will ...

The proposed South Tarawa Renewable Energy Project will install solar photovoltaic and battery energy storage system to help the government achieve its renewable energy ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy ...

The project will ultimately drive down the cost of power generation, reduce the country's reliance on imported fossil fuels, and enhance institutional ...

The South Tarawa Energy Storage Station demonstrates how cutting-edge battery technology can transform energy security in island communities. By combining solar power with smart storage, ...

Welcome to South Tarawa, Kiribati - ground zero for climate change and the unexpected testing ground for one of the Pacific's most innovative energy storage projects.

The Republic of Moldova will install a 75 MW energy storage system (BESS) and 22 MW internal
