Will Spain be able to deploy large-scale electricity storage?

The European Commission has approved a new aid scheme that will allow Spain to deploy large-scale electricity storage, both in hybridisation with renewable energy facilities and stand-alone and thermal.

What is the future of energy storage in Spain?

In conclusion, the legislative landscape for BESS in Spain is evolving to support the country's ambitious renewable energy targets. While challenges remain, the combination of supportive policies, financial incentives, and technological innovation bodes well for the future of energy storage in Spain.

How does Spain regulate electric power storage facilities?

Regulation of Electric Power Storage Facilities: In 2020, Spain introduced a specific regulation (Royal Decree 1183/2020) that defines the administrative procedures for the deployment of storage systems, including BESS. This decree aims to streamline the permitting process, addressing the complexities and delays previously encountered.

What does the 1183/2020 regulation mean for storage systems in Spain?

In 2020, Spain introduced a specific regulation (Royal Decree 1183/2020) that defines the administrative procedures for the deployment of storage systems, including BESS. This decree aims to streamline the permitting process, addressing the complexities and delays previously encountered. Grid Access and Connection:

In addition to the storage and flexibility measures, the package aims to strengthen the supervision of network operators. Spanish independent competition regulator, the National ...
