Are solar and wind projects eligible for tax subsidies?

Our Standards: The Thomson Reuters Trust Principles. The U.S. Treasury Department on Friday unveiled stricter rules for how solar and wind projects can qualify for federal tax subsidies that President Donald Trump's new tax and spending law is phasing out over the next two years.

Is the interior ending preferential treatment for unreliable wind & solar energy?

Interior Ends Preferential Treatment For Unreli... WASHINGTON -- In line with President Donald J. Trump's Energy Dominance agenda, the Department of the Interior is ending preferential treatment for unreliable, subsidy-dependent wind and solar energy.

How do financial incentives affect wind energy projects?

Financing incentives can impact overall project economics and are an integral part of the successful implementation of distributed and utility-scale wind energy. As with all energy projects, federal, state, local, and utility financial incentives are also available for wind projects.

What incentives are available for wind projects?

As with all energy projects, federal, state, local, and utility financial incentives are also available for wind projects. The Database of State Incentives for Renewables and Efficiency (DSIRE) is a comprehensive source of information on incentives that promote renewable energy and energy efficiency.

As part of this effort, the Department will address provisions in the One Big Beautiful Bill Act to eliminate longstanding right-of-way and ...

Solar container communication wind power related standards station Can a solar-wind system meet future energy demands? Accelerating energy transition towards renewables is central to ...

Since taking office in January, Trump has repeatedly sought to stall development of wind and solar energy, calling them unreliable, expensive, and overly dependent on ...

As part of this effort, the Department will address provisions in the One Big Beautiful Bill Act to eliminate longstanding right-of-way and capacity fee discounts for existing and future ...

The invention relates to a wind and solar hybrid generation system for a communication base station based on dual direct-current bus control, comprising photovoltaic arrays, a wind-power ...

Since taking office in January, Trump has repeatedly sought to stall development of wind and solar energy, calling them unreliable, ...

Perfect for communication base stations, smart cities, transportation, power systems, and edge sites, it also empowers medium to high-power sites off-grid with an energy-efficient, hybrid ...

Federal, state, local, and utility financial incentives may be available for wind energy projects. These incentives can significantly influence project economies and play an important role in ...

Wind and solar projects seeking to begin construction before July 4, 2026, must meet stricter qualification criteria for some tax ...

President Trump has been clear about his opposition to wind projects, issuing a Presidential Memorandum on his first day in office that ...

President Trump has been clear about his opposition to wind projects, issuing a Presidential Memorandum on his first day in office that officially "paused" all leasing for ...

A globally interconnected solar-wind power system can meet future electricity demand while lowering costs, enhancing resilience, and supporting a stable, sustainable ...

Battery direction of wind power in communication base stations The paper proposes a novel planning approach for optimal sizing of standalone photovoltaic-wind-diesel-battery power ...

Wind and solar projects seeking to begin construction before July 4, 2026, must meet stricter qualification criteria for some tax incentives. Wind and solar projects can start ...
