In a significant move towards enhancing its renewable energy landscape, Iran has recently entered into an agreement with private ...

Many solar firms have described Iran as a tough country to do business in, so putting up the first ever large-scale plants came with some unique challenges.

Tarztalab said the projects are part of a larger government plan to build 3,000 MW of solar capacity through the development of ...

Tarztalab said the projects are part of a larger government plan to build 3,000 MW of solar capacity through the development of modular 3-MW solar plants. Construction has ...

In a significant move towards enhancing its renewable energy landscape, Iran has recently entered into an agreement with private investors to develop solar power plants, ...

In the heart of Tehran, a city where the sun blazes with intensity, a groundbreaking study is shedding light on the future of energy optimization in high-rise buildings.

The Tehran project is one of 1,000 distributed solar plants planned under Iran's national 3,000-megawatt renewable energy ...

While Tehran's climate and geographical position make it suitable for generating solar power year-round, it is essential to consider potential environmental factors that could impede production.

While Tehran's climate and geographical position make it suitable for generating solar power year-round, it is essential to consider potential ...

The project aims to stabilize Tehran's power grid and may include a pilot battery storage system. Despite delays from geopolitical tensions, most panels are installed, with testing soon to begin.

While the political and economic landscapes are vastly different, Tehran's project of equipping schools with solar panels reinforces a universal principle: empowering local ...

The CEO of Tehran Province Regional Electricity Company announced the construction of three high-capacity solar power plants in areas including Qom province, which ...

The Tehran project is one of 1,000 distributed solar plants planned under Iran's national 3,000-megawatt renewable energy initiative. The projects are being executed as ...

Iran has signed agreements with "multiple nations" to co-develop PV technologies, share equipment, and achieve a 12% solar share of total generation by 2026--up from 0.6% ...
