-----  
What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

What are the IEC standards for energy storage systems?

Key IEC standards for energy storage systems: IEC 62619- Safety of lithium-ion batteries in industrial applications. IEC 62933-5-1 - Safety for grid-connected energy storage systems. IEC 61000 series - EMC requirements for power systems. IEC 62477-1 - Safety for power electronic converters. 3. EN Standards: The Harmonized European Norms

Will Europe reach 100 GW of energy storage?

The EU, UK, Norway, and Switzerland together are expected to reach 100 GW of installed energy storage later this month, according to new analysis launched at the Enlit Europe conference by LCP Delta and Energy Storage Europe. This milestone represents enough capacity to meet the peak electricity demand of Germany and the Netherlands.

Why should you join energy storage Europe Association?

Featuring in Energy Storage Europe Association's publications and events, such as the Energy Storage Global Conference, gives you visibility and the opportunity to strengthen your network among storage experts. European Commission published the Battery Booster Strategy as part of the European Automotive Action Plan.

The 9.5 edition of the European Market Monitor on Energy Storage (EMMES) by the Energy Storage Europe Association and LCP Delta, is now ...

Let's face it - European energy storage regulations aren't exactly cocktail party chatter. But if you're in the renewable energy game, understanding these rules is like knowing ...

This guide provides a comprehensive overview of key installation standards, site selection criteria, and compliance processes necessary for deploying C& I energy storage ...

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the ...

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European ...

In the context of Energy Storage Systems (ESS), including Battery Energy Storage Systems (BESS), UL 9540 and 9540A standards have been developed. UL 9540 is the original ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy ...

The 9.5 edition of the European Market Monitor on Energy Storage (EMMES) by the Energy Storage Europe Association and LCP Delta, is now available. The EU, UK, Norway, and ...

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. ...

Learn about the key EU energy storage certifications required for commercial and industrial systems, including CE Marking, IEC, EN standards, and national grid compliance.

Discover the evolving policies and regulations of the European Union and United Kingdom, with both issuing landmark legislation in the energy storage.

The latest edition of the European Market Monitor on Energy Storage by LCP Delta and The European Association for Storage of Energy (EASE), released today, highlights ...

Learn about the key EU energy storage certifications required for commercial and industrial systems, including CE Marking, IEC, EN ...

Develop and demonstrate a novel thermal energy storage system much more compact than state-of-the-art technologies, enabling the storage of heat and cold for domestic applications for ...
