-----

US energy storage set a Q1 record in 2025 with 2 GW added, but looming policy changes could put that growth at serious risk.

Whether installed solo on utility-scale sites or attached with solar in the residential market, battery energy storage has found its stride. "The rapid energy storage deployment ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

Experts predict what 2025 holds for U.S. energy policy: EV ...

The sharp decline in energy storage prices can be attributed to several interrelated factors: 1. Technological advancements, 2. Economies of scale, 3. Increased competition, 4. ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's ...

Experts predict what 2025 holds for U.S. energy policy: EV battery costs fall, energy storage demand surges, carbon removal hits scale, permitting reform in D.C.

In the last quarter of the year, grid-scale energy storage additions saw a 20% year-over-year decline as 2 GW of late-stage development projects were postponed to 2025.

A quick look at projections for energy storage development, including costs and types of long-duration technologies in demonstration.

The sharp decline in energy storage prices can be attributed to several interrelated factors: 1. Technological advancements, 2. ...

Whether installed solo on utility-scale sites or attached with solar in the residential market, battery energy storage has found its stride. ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From ...

Indiana added 256 MW of new storage to the grid in Q1 2025, effectively quadrupling its operational storage capacity. Indiana has more ...

Indiana added 256 MW of new storage to the grid in Q1 2025, effectively quadrupling its operational storage capacity. Indiana has more than 10 GW of new storage ...
