The world's best hotel for 2025 is a waterfront skyscraper A secret garden in Beijing has opened to visitors for the first time in a century

View the latest South America news, Canada news, Mexico news and other top stories and videos from the Americas on CNN .

It wasn't until 1954 when Bell Labs developed the first practical silicon-based solar cell. This cell was capable of a 6% energy conversion rate, a ...

The world is on track for catastrophic warming and, in an alarming twist, the worst impacts of the climate crisis are unfolding decades earlier than scientists predicted.

Systematic, months-long development of a silicon solar cell produced the functioning prototype for the first usable solar module, which was presented on April 25, 1954.

View the latest business news about the world's top companies, and explore articles on global markets, finance, tech, and the innovations driving us forward.

After a three-year run at the top of the annual list of world's most liveable cities from the Economist Intelligence Unit, Vienna has been beaten out by another European city.

View the latest news and breaking news today for U.S., world, weather, entertainment, politics and health at CNN .

Systematic, months-long development of a silicon solar cell produced the functioning prototype for the first usable solar module, which ...

In April, 1954, researchers at Bell Laboratories demonstrated the first practical silicon solar cell. The story of solar cells goes back to an early observation of the photovoltaic effect in 1839.

So here's everything you need to know about how to snap up tickets for the tournament. When do tickets go on sale? Tickets for the 2026 World Cup will be sold in three ...

View the latest Middle East news from Israel, Iran, Iraq, Syria and other Middle Eastern countries on CNN .

1974 - J. Baldwin, at Integrated Living Systems, co-develops the world's first building (in New Mexico) heated and otherwise powered by solar and wind power exclusively.

The real breakthrough came in 1954 when Bell Labs created the first practical silicon-based solar cell. This cell achieved an efficiency ...

It was not until 1888 that the first solar cell was actually built by Aleksandr Stoletov. His cell was based on the discovery of the outer photoelectric effect, which caused electrons to be emitted ...

In 1883, Fritts constructed the first solar cell by coating selenium with an extremely thin layer of gold. This simple yet revolutionary device marked the birth of photovoltaics - the conversion of ...
