Why is Tunisia investing in a secure electricity network?

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

Why should Tunisia invest in Tereg?

"By fostering renewable energy development, TEREg will strengthen Tunisia's position in clean energy, creating economic opportunities and ensuring long-term energy security," said Alexandre Arrobbio, World Bank Country Manager for Tunisia. "This project reflects our strong partnership with Tunisia and supports its sustainable development goals."

How will the Tereg program help Tunisia achieve its goals?

The TEREg program is expected to support Tunisia in achieving its goals to mobilize US\$2.8 billion in private investment to add 2.8 gigawatts of new solar and wind capacity by 2028, and create over 30,000 jobs, primarily during the construction phase of renewable projects.

How many solar and wind power projects are in Tunisia?

Solar and wind power projects subject to authorization: Tunisia has granted authorizations for projects with a capacity of 381 MW, including 261 MW of solar PV and 120 MW of wind power. 2 plants with a unit capacity of Tataouine and Sidi Bouzid.

Eckehard Tröster and Rabea Sandherr travelled to Tunisia to present the results and findings of the project. The event was held on June 26th in Tunis for representatives of the Energy ...

The World Bank is looking to recruit a technical consultant that will advise on a proposed large-scale solar-plus-battery storage ...

solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among ...

The TEREK program is expected to support Tunisia in achieving its goals to mobilize US\$2.8 billion in private investment to add 2.8 gigawatts of new solar and wind capacity by 2028, and ...

Scaling Up Energy Storage to Accelerate Renewables Energy storage is fundamental to stockpile renewable energy on a massive scale.

Tunisia's Minister of Industry, Mines and Energy, Fatima Al-Thabat Shibb, has approved four solar projects with a combined capacity of 500 MW Battery Energy Storage ...

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in ...

To accelerate the integration of renewable energy in Tunisia, BESS has been identified as a strategic priority under the MENALINKS programme. The workshop provided a ...

Tunisia is planning to embrace pumped storage, considered the most mature of the stationary energy storage technologies, but also the most expensive. A project has ...

The World Bank is looking to recruit a technical consultant that will advise on a proposed large-scale solar-plus-battery storage project in Tunisia. The consultancy work will ...

Tunisia - Tunisia, which plans to integrate 35% renewable energy into the national electricity mix by 2030 and to embed the principles of energy efficiency, would benefit from preparing the ...
