Tunisia, with Mediterranean beaches, vibrant culture and ancient ruins, is North Africa's best-kept secret. Plan your time and budget with this guide.

Self-generation is growing as businesses and households adopt solar. The Ministry estimates nearly 400 MW of low-voltage PV capacity installed, with 70 MW operational, ...

The project, estimated to cost \$932 million, consists of the construction of a 600 MW high-voltage direct current cable that will link the grids of Tunisia and Italy and enable ...

The Republic of Tunisia is the northernmost African country and is bordered by Algeria, Libya, and the Mediterranean Sea. It has a population of 12,277,100 million as of 2024 ...

Visit the Definitions and Notes page to view a description of each topic.

The Project to Develop and Equip the Power Transmission Grid (PAERTE) aims to strengthen Tunisia's power grid and allow for greater additions of renewable capacity, specifically wind ...

The bottom right of the map lists announced solar projects where final locations have yet to be confirmed. An inset provides greater detail for the area around Tunis. Existing ...

This strategic initiative is designed to simplify complex procedures, drastically shorten waiting times, and ultimately encourage the wider adoption of solar energy across ...

Explore Tunisia's rich culture, fascinating history, and stunning landscapes, nestled between Algeria and Libya on the Mediterranean coast.

We are 50% operators of the Tataouine photovoltaic power plant in Tunisia, which is connected to the national grid.

Tunisia in depth country profile. Unique hard to find content on Tunisia. Includes customs, culture, history, geography, economy current events, photos, video, and more.

Located on the northeastern coast, Tunis is the capital and largest city of the country, which is itself named after Tunis. The official language of Tunisia is Arabic. The vast majority of ...

With an installed capacity of 120 MWp, the solar plant is expected to generate approximately 222 GWh of clean electricity annually, enough to power around 43,000 ...

This landmark project will be the first large-scale privately financed grid-connected solar independent power producer in the country and will support the government of Tunisia's ...

This literature review describes the basic concepts of solar energy and the production of electricity using the photovoltaic effect in the case of Tunisia. The main elements of the photovoltaic ...

This milestone injects robust momentum into the region's green energy development. The project is located in Kairouan, central-eastern Tunisia, with a total installed ...
