---

GB battery buildout hit 5.2 GW in Q1 2025. This report breaks down new projects, rising durations, and how portfolios are scaling across the market.

From policy changes for planning and accelerating grid connection to new revenue streams for energy storage providers, 2025 is set to be a big year for batteries in the UK.

Large-scale battery systems, pumped hydro and other storage methods could capture the excess energy injected by wind farms on windy days and release it when needed. But are these ...

Discover the top behind-the-meter (BTM) trends from Gridcog Unplugged London, including market reform, co-location strategies, and battery storage investments. Learn how regulatory ...

A total of 1,420MW/2,840MWh of battery energy storage system (BESS) projects were awarded planning consent over the course ...

DNV's third UK Energy Transition Outlook (ETO) report concludes that electricity demand will more than double by mid-century, ...

DNV's third UK Energy Transition Outlook (ETO) report concludes that electricity demand will more than double by mid-century, with renewable sources in the form of wind and ...

Discover the top behind-the-meter (BTM) trends from Gridcog Unplugged London, including market reform, co-location strategies, and battery ...

A total of 1,420MW/2,840MWh of battery energy storage system (BESS) projects were awarded planning consent over the course of April 2025, the data shows, slightly less ...

Renewable energy project approvals hit record high in GB in 2025, data shows Applications to build battery storage drive boom as offshore wind projects given go-ahead ...

In 2025 to date, approximately 1,405MW of new battery storage capacity has been commissioned, already surpassing the 2024 total of 1,249MW. According to EnergyPulse's ...

In 2025 to date, approximately 1,405MW of new battery storage capacity has been commissioned, already surpassing the 2024 ...

Explore how the UK Renewables & Solar Roadmap, grid reform and new storage support are reshaping projects and skills in 2025, and what this means.

Despite the recent success behind renewables, including battery energy storage projects, there continues to be headwinds which ...

Despite the recent success behind renewables, including battery energy storage projects, there continues to be headwinds which could hinder progress. That includes the still ...
