-----  
What is Uruguay's energy strategy?

In 2005, Uruguay initiated a dramatic shift in its energy strategy, moving from petroleum-based electricity generation to renewable sources. In 2024, Uruguay generated 99 percent of its electricity from renewable sources using hydropower (42 percent), wind (28 percent), and biomass (26 percent).

What is the oil and gas industry like in Uruguay?

Uruguay's oil and gas sector is relatively underdeveloped, as the country does not produce hydrocarbons domestically and relies entirely on imports to meet its fossil fuel needs. State-owned ANCAP (Administraci#243;n Nacional de Combustibles, Alcohol y Portland) oversees the sector, managing imports, refining, storage, and distribution of fuels.

Why does Uruguay have a surplus of electricity?

Uruguay generally has a surplus of electricity due to excess wind-power installed capacity. The country seeks to identify additional domestic uses for excess electricity and potentially increase exports to Argentina and Brazil.

How much solar energy does Uruguay get?

Uruguay receives an average 1,700 KW per square meter of sunlight a year, on par with Mediterranean countries although solar represents only a fraction of the country's total electricity production. Uruguay's Investment Promotion Law offers incentives for investing in solar manufacturing, systems implementation, and solar energy utilization.
