Will Victorian Government approve a battery energy storage system?

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of projects to support its renewable energy ambitions.

Why is battery storage so important in Victoria?

This technology is critical as more renewable energy is connected to the grid. Victoria is already the home of big batteries. It has 537 megawatts of operational battery storage capacity currently in operation. That's more than any other state.

What is Victoria's largest battery energy storage system?

The \$350 million (USD 224.4 million) project, being developed near the town of Little River about 45 kilometres southwest of Melbourne, will be one of the state's largest battery energy storage systems if it goes ahead and will "support Victoria's clean energy transition."

Is a \$453 million battery storage facility coming to Victoria?

A \$453 million battery storage facility planned for Victoria's north-east has been approved by the state government. Premier Jacinta Allan announced the project in Beijing after meeting representatives from Trina Solar, the Chinese company building the 500-megawatt Kiewa Valley project.

We are building Victoria's renewable energy future and investing in critical battery storage technology. This strengthens the grid and stores cheaper, ...

The Victorian State Government has expedited AC Energy's battery energy storage system (BESS) project in Little River through its Development Facilitation Programme. ...

Victorian Premier Jacinta Allan has announced the approval of a major battery energy storage system in the state's north-east during a trip to China. Ms Allan says the \$453 ...

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as ...

Both batteries began operating over the summer of 2018 and 2019. The Ballarat Energy Storage System is located at the Ballarat Terminal Station in Warrenheip, Victoria. ...

We are building Victoria's renewable energy future and investing in critical battery storage technology. This strengthens the grid and stores cheaper, cleaner renewable energy for when ...

Both batteries began operating over the summer of 2018 and 2019. The Ballarat Energy Storage System is ...

The battery system is intended to capture and store renewable energy produced during daylight hours, which can ...

NEWS: A massive new \$450 million Tesla Megapack battery energy storage system is now operational in Victoria, Australia. It's the biggest completed battery project on ...

Victoria's second-largest battery energy storage system has officially commenced operations, marking a significant milestone in Australia's transition to renewable energy. The ...

Victoria's second-largest battery energy storage system has officially commenced operations, marking a significant milestone in ...

The Victoria government in Australia has approved a 300MW/1,200MWh battery energy storage system (BESS) in Gippsland and a 332MW solar PV power plant with ...

Construction will now commence on the four-hour, 350 MW Wooreen energy storage system. Once completed in 2027, the system will be capable of powering 230,000 ...

The battery system is intended to capture and store renewable energy produced during daylight hours, which can subsequently be reintroduced into the electricity grid when ...

The Victorian government has fast tracked the approval of what is to be one of the state's biggest battery energy storage systems as it seeks to accelerate the development of ...

Construction will now commence on the four-hour, 350 MW Wooreen energy storage system. Once
