-----

There are many types of energy storage technology with different applications in modern energy systems. This paper provides an up-to-date review of these storage ...

The article examines the present state of BESS in Vietnam, highlighting local manufacturing capabilities and regulatory challenges. It also explores strategic approaches outlined in ...

As Vietnam's economy grows, the demand for energy is rising rapidly, putting significant pressure on the country's infrastructure. This surge in demand has exposed ...

There are many types of energy storage technology with different applications in modern energy systems. This paper provides an up-to-date review of these storage technologies and energy ...

Tax incentives, investment support, and advanced technology transfer have created favorable conditions for both private enterprises and state ...

As Vietnam's economy grows, the demand for energy is rising rapidly, putting significant pressure on the country's infrastructure. This ...

A strategic analysis of Vietnam's energy future: why Battery Energy Storage Systems (BESS) will decide enterprise competitiveness by 2026, and how SolarBK is shaping the first ...

This study analyses and anticipates the challenges that may arise in frequency stability in Vietnam's power system by 2030, when the renewable energy integration is ...

ide an overall assessment of the economic-environmental benefits and financial performance of integrating

BESS into renewable energy production in industrial zones. Specifically, this study ...

This study analyses and anticipates the challenges that may arise in frequency stability in Vietnam's power system by 2030, when the ...

This presentation summarizes the analysis and key takeaways. CEIA-Vietnam's Co-leads Hang Dao and Tung Ho contributed significantly to the research of this study.

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power ...

Among the key objectives were the upgrade of the power transmission and distribution system, acceleration of the roadmap to build a smart power system, and development of an energy ...

Tax incentives, investment support, and advanced technology transfer have created favorable conditions for both private enterprises and state organizations to participate in the ...

Industrial parks have emerged as critical proving grounds. With manufacturers confronting peak-hour pricing pressures and supply chain sustainability mandates, behind-the ...
