Why is Vilnius Bess important?

Vilnius BESS facility will be able to supply all balancing services (FCR,aFRR,and mFRR) required by the grid and provide grid forming functions. The development of such energy storage projects will enhance the stability of the electricity grid,which is vital for the energy independence of the Baltic states.

What is E-Energija group's Vilnius Bess?

The Vilnius BESS is designed to address these dynamics,ensuring a reliable energy supply for consumers. E-energija Group's initiative reflects a practical approach to integrating renewable energy into Lithuania's grid,with the system set to play a vital role in balancing supply and demand once operational.

What is Lithuania's largest battery storage facility?

This project will become Lithuania's largest battery storage facility that is privately owned, boosting the country's total storage capacity by approximately 50%. The project is located near Vilnius and will be operational by the end of 2025.

Are wires the best way to implement a BMS?

Wires are the de facto methodof implementing a BMS today. In many cases,it is the most reliable way to achieve Automotive Safety Integrity Level D (ASIL D) compliance because functional safety capabilities are built into the daisy-chained wired communication protocol.
