Is Burkina Faso suitable for solar power projects?

This suitability assessment was carried out at the request of the Government of Burkina Faso to map potential areas for utility-scale solar photovoltaic (PV) and wind projects. Currently, less than 25% of the population has access to electricity and the majority of those with access live in urban areas.

Can Burkina Faso achieve 95% electricity access?

The country aims to reach 95% electricity access, with 50% in rural areas and universal access to clean cooking solutions in urban areas, with 65% in rural areas by 2030, up from 9% in 2020. The utilisation of Burkina Faso's renewable resource potential would enable the country to reduce its heavy reliance on thermal generation and energy imports.

How many solar power plants are in Burkina Faso?

“Burkina Faso: 2 solar photovoltaic power plants (68 MWp) inaugurated in Kodéni and Pâ”. Afrik21.africa. Paris, France. Retrieved 5 January 2024. ^Jean Marie Takoueu (25 October 2021). “Burkina Faso: Africa Ren launches the construction of the Kodéni Solar plant in PPP”. Afrik21.africa. Paris, France. Retrieved 31 October 2021.

What is Burkina Faso's road network?

The road network considered in this analysis was provided by the National Observatory of Territorial Economy office in Burkina Faso. It includes the national, regional and departmental roads across the country as shown in Figure 6. Figure 6. Burkina Faso's road network

This study seeks to map areas in Burkina Faso that are suitable for deploying utility-scale solar photovoltaic (PV) and wind power projects.

Published January 2025, this map provides a detailed view of the power sector in Burkina Faso. The locations

of power generation ...

Published January 2025, this map provides a detailed view of the power sector in Burkina Faso. The locations of power generation facilities that are operating, under ...

More specifically, the project will result in the connection of 218,400 new households to the power grid using an innovative system that will defer payment of ...

Major commercial projects now deploy clusters of 15+ systems creating storage networks with 80+MWh capacity at costs below \$270/kWh for large-scale industrial applications. ...

Radio broadcasts in French and local dialects are a major form of government communication. There are 17 FM stations, 2 AM stations, and 1 SW station that broadcast to 370,000 radio ...

Existing and future transmission lines are shown ranging from 150kV to 400kV (some 90KV and lower voltage lines are also shown). Actual and planned cross-border ...

Burkina Faso has 25 power plants totalling 569 MW and 1,992 km of power lines mapped on OpenStreetMap. ... If multiple sources are listed for a power plant, only the first ...

Data and information about power plants in Burkina Faso plotted on an interactive map.

This study seeks to map suitable areas in Burkina Faso for deploying utility-scale solar photovoltaic (PV) and wind power projects.

List of power stations in Burkina Faso The following page lists all power stations in Burkina Faso.

Existing and future transmission lines are shown ranging from 150kV to 400kV (some 90KV and lower voltage lines are also shown). ...
