-----

The Ibri III Solar Independent Power Project will combine a 500MW photovoltaic plant with a 100MWh battery energy storage system. The consortium includes Abu Dhabi ...

The Abu Dhabi-based Masdar, a global clean energy leader, will lead the consortium developing the Ibri III Solar Independent Power Project, which ...

Oman is taking a monumental step in its renewable energy journey, with its first utility-scale solar and battery storage project being awarded to a consortium of ACWA Power, ...

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

The Minister said that the first renewable energy storage project in Oman will be announced soon, adding that these projects will strengthen Oman's transition to renewable ...

The Ibri III project will combine a 500 MW solar plant with a 100 MWh battery energy storage system, making it Oman's first utility ...

A consortium including Abu Dhabi Future Energy Co. (Masdar), Al Khadra Partners, Korea Midland Power Co. and OQ Alternative Energy have been chosen to build a ...

Taiwan's Innovative Green Economy Roadmap (TIGER) is a two-year program with the MIT Energy Initiative, exploring ways that industry and government can promote and adopt ...

Milan-headquartered Energy Dome's revolutionary CO<sub>2</sub>-based energy storage battery system enables the

round-the-clock dispatch of renewable electricity from solar and ...

The Abu Dhabi-based Masdar, a global clean energy leader, will lead the consortium developing the Ibra III Solar Independent Power Project, which combines a 500-megawatt (MW) ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

Solar energy in Oman is expected to become progressively cheaper in the near future and could be a best return for investments. Its success is merely determined by the ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

Growing energy demand means the U.S. will almost certainly have to expand its electricity grid in coming years. What's the best way to do this? A new study by MIT ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...
