-----

The Asuncion Gravity Energy Storage Construction project uses 50-ton concrete blocks and good old gravity to store enough energy to power 100,000 homes [1]. Think of it as the world's most ...

The Asuncion Energy Storage Project bidding process aims to fix this glaring inefficiency through a 150MW/600MWh battery storage system, potentially becoming South America's largest ...

100 massive concrete blocks, each weighing as much as 10 adult elephants, dancing to the rhythm of Paraguay's electricity demand. This isn't a sci-fi movie plot - it's the revolutionary ...

Paraguay's new Ley de Almacenamiento Energético offers tax breaks covering 30% of storage system costs. Plus, there's this neat twist--projects using locally sourced materials get priority ...

Move over, lithium - there's a new storage sheriff in town. The winning bid's hybrid approach uses flywheels (yes, those spinning disks you studied in physics) for short-term ...

Containerized energy storage solutions now account for approximately 45% of all new commercial and industrial storage deployments worldwide. North America leads with 42% market share, ...

Did you know Paraguay's electricity demand grew 42% in the last decade? Let's explore how modern energy storage systems are reshaping Asuncion's power infrastructure.

Built at the Marseille-Fos Port, the marine geothermal power station Thassalia is the first in France, and even in Europe, to use the sea's thermal energy to supply linked buildings with ...

Learn how Paraguay is improving its electrical and energy system with the help of ANDE to help power the
