-----  
What are the main energy sources in Tanzania?

Tanzania is endowed with diverse energy sources including biomass, natural gas, hydro, coal, geothermal, solar and wind power and uranium, much of which is untapped. Commercial energy sources i.e., petroleum and electricity, account for about 8% and 1.2%, respectively, of the primary energy used. Coal, solar and wind account for less than 1%.

What is the power sector in Tanzania?

The Tanzania power sector is dominated by a single vertically integrated national utility, Tanzania Electricity Supply Company Ltd (TANESCO). The total grid installed generation capacity of both TANESCO's power plants and private producers is currently at 1,438.24 MW. 561 MW is generated from TANESCO owned hydro power stations and thermal 658 MW.

What is the power distribution system in Tanzania?

The generation, transmission, and distribution of power in Tanzania, is channeled through TANESCO, which is fully owned by the government and is responsible for 98% of the electricity produced in the country. As of June 2022, the power distribution network length was 160,811 km, of which 160,367 km was for TANESCO and 444 km for Mwenga.

How much power does Tanzania have?

Tanzania's total power installed capacity is 1,938.35 MW as of 31st December 2023. Of the grid installed capacity of 1,899.05 MW, 1,193.82 MW or 63% is produced with natural gas, 601.60 MW or 32% is hydropower, 83.93 MW or 4% is produced with fuel, and 10.5 MW or less than 1% is obtained with biomass.
